## Key

***f*** = Test frequency

**Mf** = Mean attenuation value

**Sf** = Standard deviation

**APVf** (Mf - Sf) = Assumed Protection Value

**H** = High-frequency attenuation value

**M** = Medium-frequency attenuation value

**L** = Low-frequency attenuation value

**SNR** = Single Number Rating (the value that is subtracted from the measured C-weighted sound pressure level, LC in order to estimate the effective A-weighted sound pressure level inside the ear)
